

Doctor recommendation letter sample

Dear Mr. Jones,

I feel pleased to write this letter of endorsement for Dr. Anurag Sharma, my staff psychiatrist, who worked under my supervision at Fortis Hospital, New Delhi for the last six years. He is a committed medical professional and has demonstrated his acumen in clinical as well as administrative domains of his area of interest. For the last four years, he has been serving in the managerial department of our Psychiatry department when I am on leave. I have come to know that he has decided to embrace a progressive career path, and would like to recommend him as an ideal candidate. Your urban medical centre would be apt for him to stride along to a happening career, where he can manage the psychiatric ward with responsibility and care.

In the last couple of years, our organization significantly expanded the treatment facilities for substance abuse in the mental health outpatient department. It was then that Mr. Sharma had a phenomenal role to play while we integrated our latest facilities. I, therefore, appreciate his administrative abilities and the ability to select the right staff. He also worked along with me while we shortlisted our interns who would be looking after the mental health requirements of our organization. Anurag's expertise and experience in this domain have proven advantageous to our hospital. I am confident that he will carry on with his good work. His skills and organizational abilities make him an ideal pick for your organization.

Dr. Sharma also collaborated with our team while we were working on our Post Traumatic Stress Disorder Program.

. Our hospital is located close to the urban zones, which makes it a busy place for doctors. It was largely due to the compassion and coordination of Dr. Sharma, along with his esteemed ethical standards that we could fulfill the expectations of our patients. In the process, we came up with effective strategies to help patients deal with their challenges in mental health.

I would also express my gratification to Dr. Sharma as he helped us work on our Psychiatry Internship Program. He carefully evaluated the needs of the patients and identified the scope of medical students who would be interning at our organization. This program was meant for aspirants who would be studying in the third year in the medical school. We are happy with his contribution in working on the seminar curriculum, while he also configured special clinical assignments and decided how the interns would be supervised.

Considering his potential to contribute to your esteemed organization, I recommend Dr. Anurag Sharma for the vacancy of a staff psychiatrist. Feel free to reach out to me for any further details on Dr. Sharma that would be beneficial to you.

Respectfully,
Surest Agarwal, M.D.
Chief of Psychiatry,
Fortis Hospital, New Delhi
