The High Commission of Australia

Australia

Subject: Request for Visa Extension

Respected, Sir/Madam

To start, I truly want to thank the government of Australia for permitting international understudies such as myself access to such a welcoming and supportive environment. I have generally imagined that achievement is unavoidable in the event that one invests the vital energy to succeed. My core value for progress has forever been this. I had the option to propel my scholarly and career objectives on account of my determination and responsibility. My name is Krishna Jayakumar, and I was born on DOB. I'm a permanent resident of India and reside in Kerala. Subsequent to finishing my bachelor's studies in India, I went with the choice to proceed with my advanced education at XYZ University for the master's in Hotel Management program. I'm a profoundly skilled and persistent understudy. I arrived in Australia in the wake of acquiring acceptance to the program from the college on (month, date, and year). My visa terminates on (date, month, year), and the course closes on (day, month, year). I'm presenting this statement of purpose to request for an extension of visa so I can complete my postgraduate studies at XYZ University.

I'm a native of a small village near Thrissur in Kerala. My family comprises my father, mother, my elder sister, and myself. My father is an agricultural officer, and his name is (name). (Name) is the name of my mother, and she is a primary school teacher. My elder sister is married and lives in Chennai, Tamil Nadu. I feel a close bond with my family since I come from one that maintains customary Indian practices and convictions. They have roused me to follow my dreams, regardless of what can be. For my entire life, they gave me both material and emotional help. With their assistance and care, I acquired 94% and 96% in my SSC and intermediate studies at ABC School, respectively. In the wake of completing school, I went to ABC College to

*procure a bachelor's in Hotel Management. It offered me the chance to improve my capacities and knowledge while educating me in the basics of hotel management.*

*Over the long run, my passion for cooking propelled me to seek a career in hotel management. At the point when I had the option to figure out what I needed to seek, my dad was very excited. Subsequently, meeting with my academic guide supported my progress in acquiring admission to XYZ University in Australia. Australia's instructive levels are outstanding when contrasted with those of different countries. Australian education is unequaled regarding worth and exposure on an overall scale. The country flaunts a diverse populace, which offered me the chance to encounter different societies and food varieties. I acquired a more far reaching comprehension of the subject by getting to know and engage with individuals from all around the world. Likewise, it furnishes global understudies with a warm and safe scholarly climate.*

*The course curriculum and the teaching style is what attracted me to XYZ University. Their class had a little, controllable number of understudies, which is good for interacting and studying. Likewise, this offers the students the required attention and care they need in the class. The consideration and support from the professors helped me in my scholastics.*

*The college's course curriculum effectively integrated an assortment of experiential and bunch learning procedures, including discussions, gatherings, projects, and internships, to ensure that the understudies had the most ideal field training encounters. The university has also given me a scholarship for my expenses. Thus the university helped my development in many ways.*

*With the aid of savings and a student loan, the course is paid for. All required documents are attached for your reference. With sufficient experience and a degree that is perceived globally, I need to establish my own business in my home country.*

*However, the shift and my endeavors to arrive in Australia have resulted in insufficient time to finish the degree in Australia according to the terms of my visa. My student visa will expire on (day, month, and year) as of this moment, which is essentially sooner than when my master's program at XYZ University would come to*

*an end. I will finish my post graduate degree at the XYZ University in (day, month, and year), which is around x months after the expiry of my ongoing visa.*

*Hence I need to apply for a visa extension for a time period that will empower me to complete my post-graduate degree at XYZ University. I have generally observed the guidelines and rules laid out by the student visa while I have been in Australia, staying in line with its conventionality. Considering my scholarly accomplishments in Australia to date and my future career objectives, I humbly and hopefully request that you give my request for a visa extension careful consideration. To facilitate your comprehensive review, I have included the application and all necessary supporting documentation.*

*To the best of my knowledge and understanding, I, Krishna Jayakumar, confirm that all the previously mentioned information is valid and exact all around.*

*Therefore, I am kindly asking you to consider my application for a visa extension.*

*I appreciate you taking the time to read this.*

*Krishna Jayakumar*
